

RANDOLPH COUNTY PUBLIC LIBRARY

What county residents are saying about their library!*

I was able to come here to do my research papers in my college classes, using the computer as I didn't have one at the time. The staff were wonderful in helping me not only with my reference subjects but by listening to my ideas and offering suggestions of different materials. With their help and services I was able to get my degree and get a much better job to provide for my family.

Staff assisted me into getting the necessary materials which resulted in getting a job.

While I was in College they were very supportive.... I was an older adult that had to go back to school to be able to get a job. I knew nothing about computers and couldn't find a job anywhere. I also had to get my GED before I could do anything. [Librarian Donna] Toomes told me about a web site I could practice on for my GED.... I graduated with honors. I work at the college I graduated from.

I have done Prezi projects in the library through their Internet system because I had just moved in from my old house. I got good grades and I succeeded in my class.
—Ramseur patron

"It helped my kindergartener reach a level E in such a little amount of time, even his teacher was impressed. I still can't believe how good a reader he has become."
